

CABLE RACK

AERIAL CABLE SLACK STORAGE

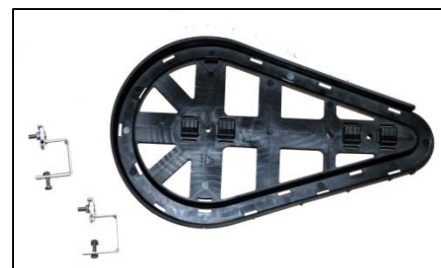

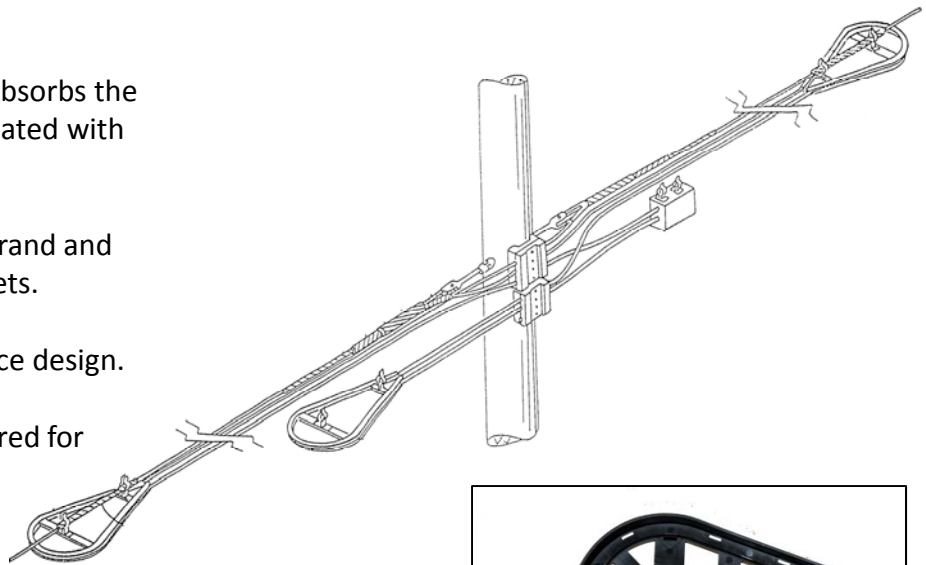

FEATURES:

- Non-conductive, molded plastic body increases the overall system liability by eliminating cable damage from the storage device.
- Flexible plastic body absorbs the rigorous shocks associated with stand movement.
- Available with both strand and ADSS mounting brackets.
- User-friendly, one piece design.
- No special tools required for installations.

The OPTITEL Cable Rack aerial ADSS cable management bracket are used in the storage of additional lengths of aerial ADSS cable along the strand for later use. OPTITEL Cable Racks also double as a safeguard, insuring the minimum bend radius of the fiber optic cable while guaranteeing proper installation.
